PAPERS RECEIVED

Applicants claim for priority under 35 USC 119 is acknowledged and a Certified copy of priority document has been received.

CLAIMS

The claims are 1-16.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 3, drawn to a magnetic disk substrate, classified in class 428, subclass 694SG.
 - II. Claims 4 -16, drawn to a method of polishing, classified in class 451, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as impressing the texturing marks in the substrate by stamping.

Election of Species

3. This application contains claims in both Groups I and II directed to the following patentably distinct species of the claimed invention:

- a. A magnetic hard disk substrate composed of an aluminum substrate and
- b. A magnetic hard disk substrate composed of a glass substrate.

If either Group I or Group II is elected applicants are required, under 35 U.S.C. 121, to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If

claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct: applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter added a burden to examination, restriction for examination purposes as indicated is proper.

Attorney called

5. A telephone call was made to Keiichi Nishimura, esq. on March 10, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

CONCLUSION

The claims are to .

- Restriction has been required.
- No claim has been allowed.
- No Information Disclosure Statement has been received.
